

testing::Test

```
classDiagram
    class DynamicUnitTestFixture
    class testingTest["testing::Test"]
    DynamicUnitTestFixture --|> testingTest
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'DynamicUnitTestFixture'. A blue arrow points vertically upwards from this box to a white box labeled 'testing::Test' at the top. This represents that 'DynamicUnitTestFixture' inherits from or specializes 'testing::Test'.
